

UDS INSIGHT EXCHANGE

Tuesday, July 21st, 2026 1:00-2:00 PM

We've rescheduled UDS Insight Exchange – Session 2 to July 21st.

HRSA has indicated the proposed 2026 UDS Manual changes will be posted in the Federal Register sometime in June, with the final publication and technical assistance webinars released following the 30-day comment period.

During this session, Jillian will walk participants through the significant changes and facilitate discussion on updated reporting requirements with the most current information available. Our goal is to help your health center stay informed, prepared, and confident as UDS reporting requirements continue to evolve.

During the session:

- Overview of proposed 2026 UDS Manual changes and anticipated reporting impacts
- Explore upcoming reporting requirement changes and what they may mean for health centers.

Jillian is a Senior Program Manager at Next Level Health Innovations with over a decade of experience helping health centers strengthen health IT, enhance quality reporting, and prepare for value-based care. She previously led HRSA's HITEQ Center at JSI, providing national training and technical assistance on UDS reporting, and continues to support health centers in navigating UDS and related requirements.

JILLIAN MACCINI
SENIOR PROGRAM MANAGER

We'd love to have you join us!
