

STRENGTHENING CYBERSECURITY THROUGH THE NIST FRAMEWORK ALIGNMENT

Wednesday, July 22nd, 2026 10:00-11:00am

Join us for an upcoming session on Strengthening Cybersecurity Through NIST Framework Alignment. As cyber threats continue to evolve and regulatory expectations increase, organizations need a structured approach to managing cybersecurity risk and building resilience.

This session will provide an overview of the NIST Cybersecurity Framework (CSF) and demonstrate how organizations can leverage it to assess current capabilities, identify gaps, prioritize improvements, and strengthen their overall security posture. This session will also provide practical guidance and actionable insights to help your organization align with industry-recognized cybersecurity best practices.

Designed for cybersecurity professionals, IT leaders, compliance officers, and risk managers.

WIPFLI

KEN KULAWIAK

WIPFLI SENIOR MANAGER

What You'll Learn

- Overview of the NIST Cybersecurity Framework (CSF) and its core functions
- How to assess your organization's current cybersecurity maturity and identify gaps
- Best practices for developing a roadmap toward improved cybersecurity maturity
